

Guide 1 — Account Creation & POS Integration

Bump-it Kitchen Display Platform · Setup Guide 1 of 4

Create your account, connect your point of sale, and set how many bump screens you need.

Time required: about 10 minutes.

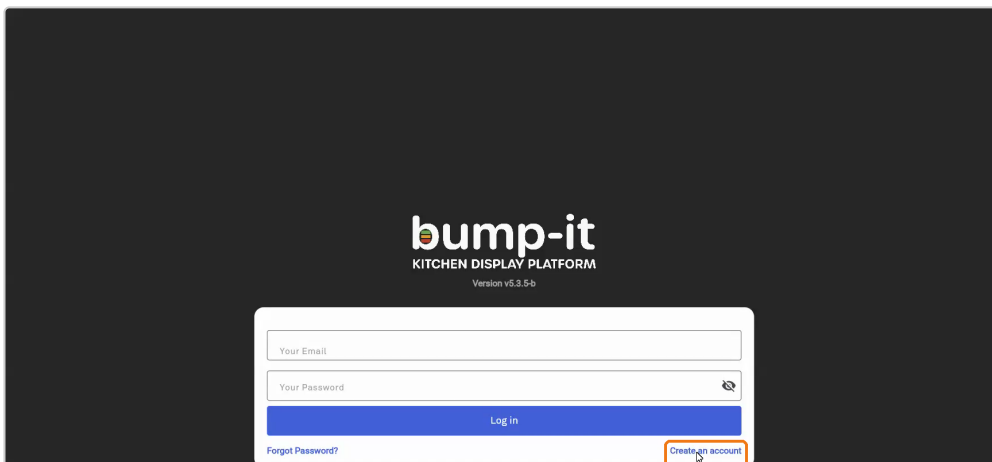

Before you start

- Have your point-of-sale login details ready.
- Know how many screens your venue needs. **Each subscription includes one bump screen and one pass screen.**
- Bump-it requires constant internet.

PART A — CREATE YOUR ACCOUNT

Step 1

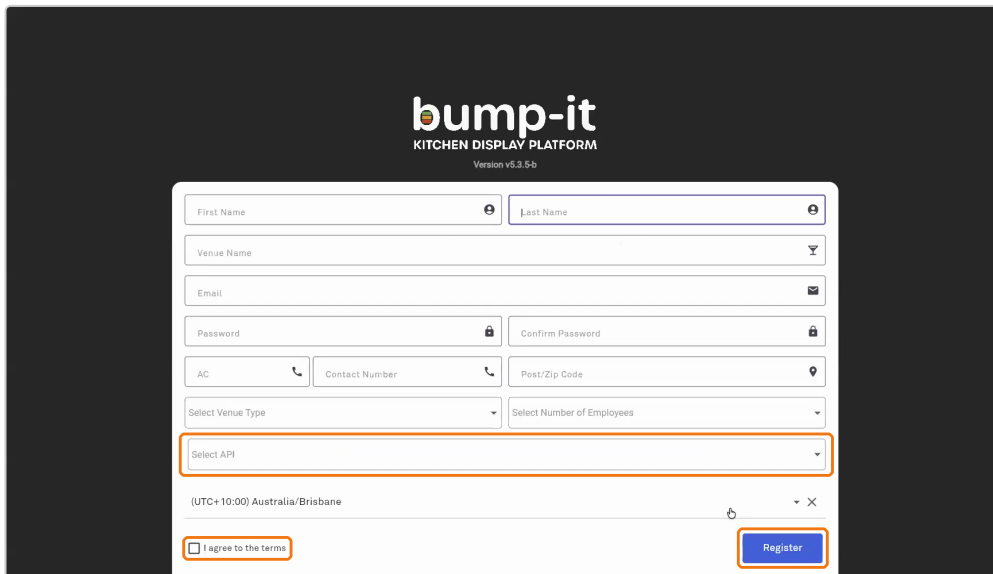

On the login screen, click **Create an account** (bottom right).

Step 1 — Login screen. Already have an account? Log in here instead.

Step 2

Fill in your details, choose your point of sale under **Select API**, and check the **time zone** is correct. Tick **I agree to the terms**, then click **Register**.

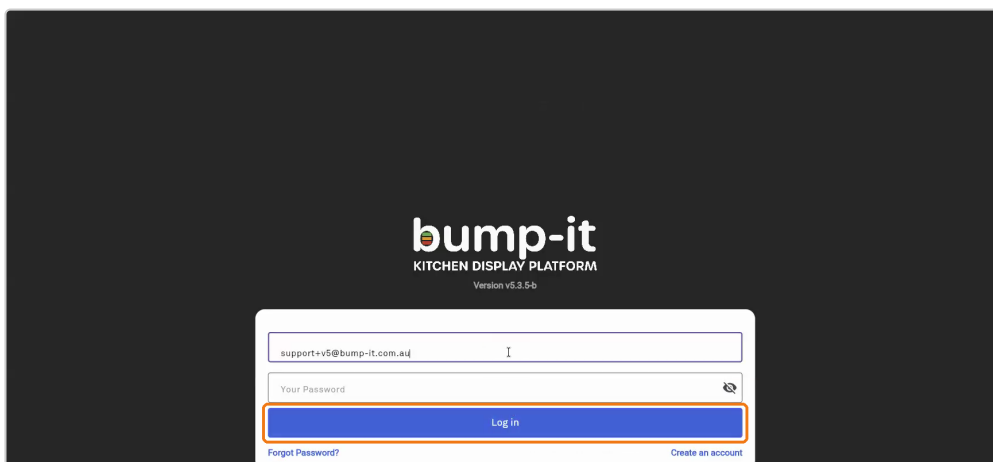

Step 2 — Registration form. Select API is your point-of-sale integration.

Select API is the point-of-sale field. If you pick the wrong one here, no orders will reach your bump screen.

Step 3

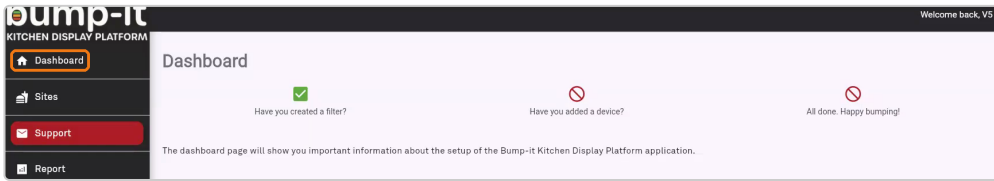

Log in with your email and password.

Step 3 — Log in.

Step 4

You land on the **Dashboard**. It tracks your setup progress with a tick or cross against each step.

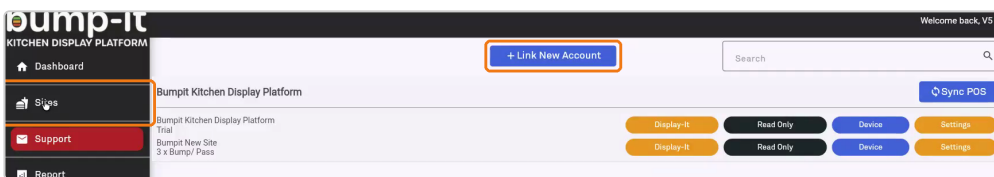

Step 4 — Dashboard. Left sidebar: Dashboard · Sites · Support · Report.

PART B — LINK YOUR POINT OF SALE

Currently supported: Lightspeed Restaurant (K-Series) and IMPOS. Step 6 has a section for each — follow the one for your point of sale and ignore the other.

Step 5

Click **Sites** in the left sidebar, then click **+ Link New Account**.

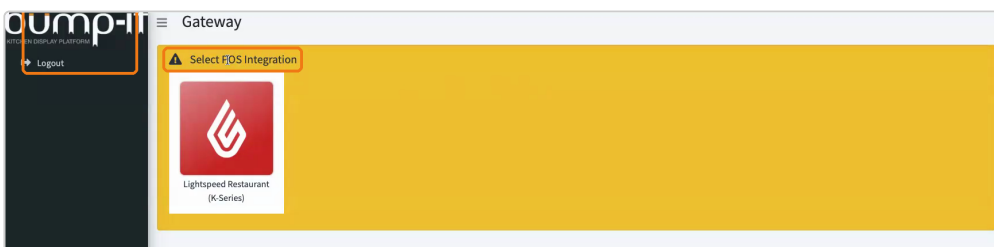

Step 5 — Sites page. + Link New Account is circled above.

Sites is where everything lives. If you ever get lost, click **Sites** to come back here.

Step 6

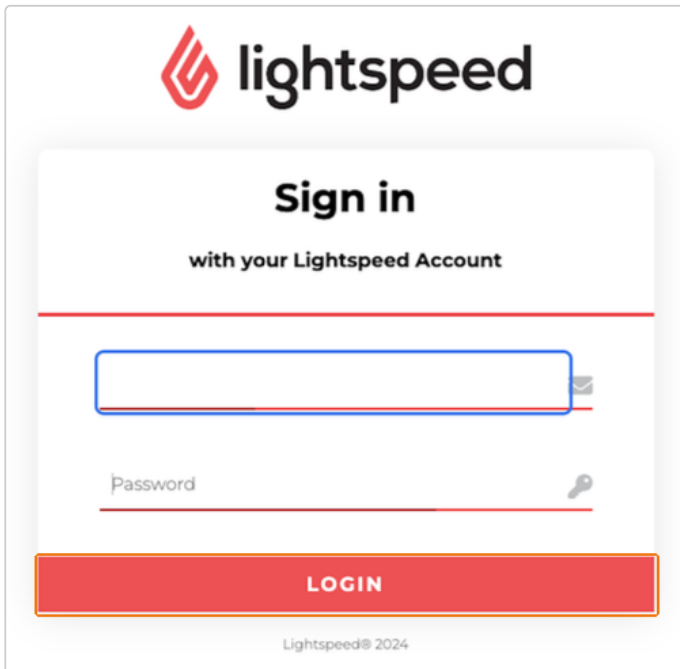

The **Gateway** page opens with **Select POS Integration**. Click your point of sale, then follow the section below for it.

Step 6 — Select POS Integration. You see the point of sale you chose under Select API when you registered.

Lightspeed Restaurant (K-Series)

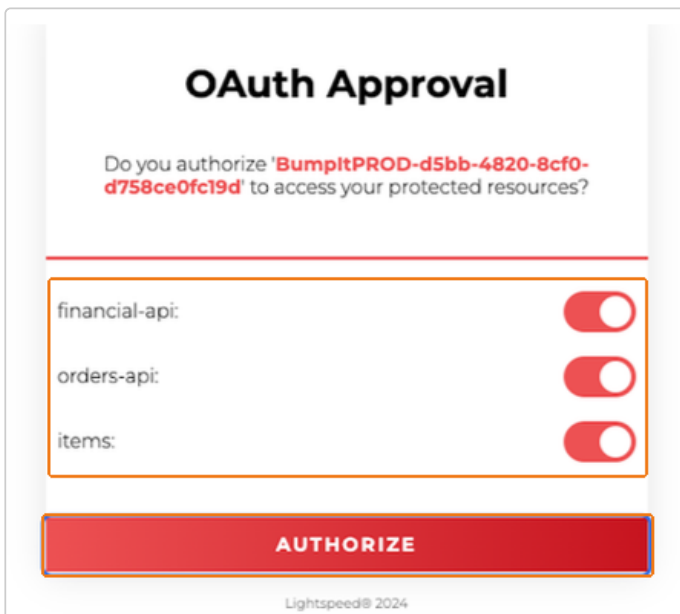

Sign in with your point-of-sale username and password.

The screenshot shows the Lightspeed login interface. At the top is the Lightspeed logo. Below it, the text "Sign in" is centered, followed by "with your Lightspeed Account". There are two input fields: the first is for the username (with an email icon) and the second is for the password (with a key icon). A red "LOGIN" button is at the bottom. The footer says "Lightspeed® 2024".

Step 6 — Sign in with your Lightspeed account, then press LOGIN (circled above).

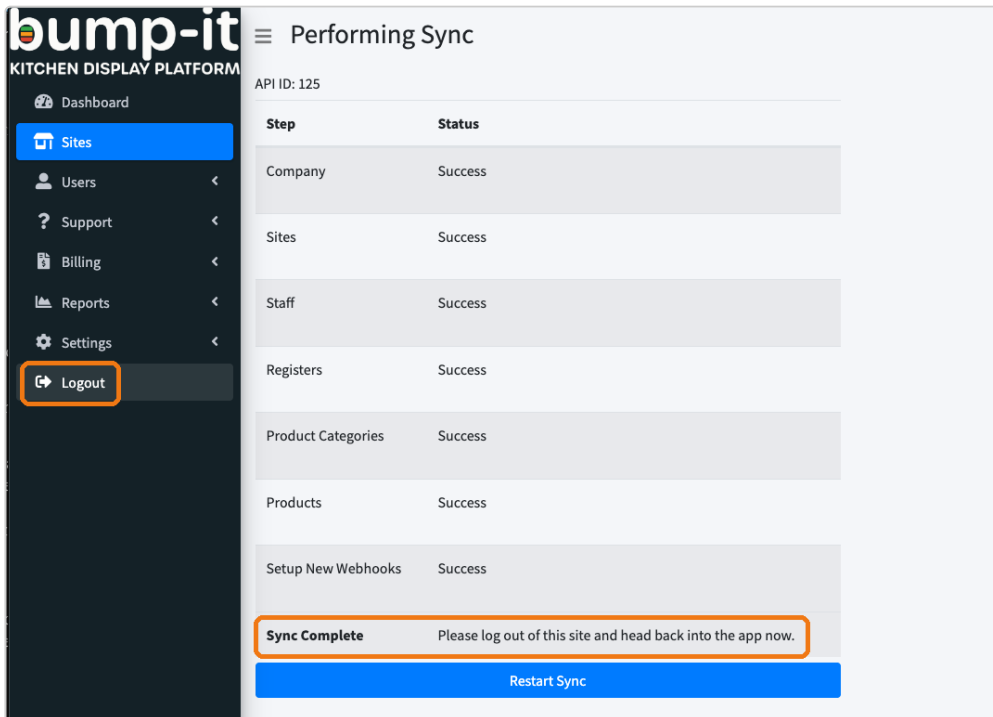

An **OAuth Approval** screen appears. Make sure **all three permissions are switched on**, then press **AUTHORIZE**.

The screenshot shows the OAuth Approval screen. It asks "Do you authorize 'BumpltPROD-d5bb-4820-8cf0-d758ce0fc19d' to access your protected resources?". Below this, there are three permissions listed: "financial-api:", "orders-api:", and "items:". Each has a red toggle switch to its right, all of which are currently turned on. A red "AUTHORIZE" button is at the bottom. The footer says "Lightspeed® 2024".

Step 6 — All three permissions are circled above — leave them all on, or the sync will be incomplete. Then press AUTHORIZE.

The sync then runs and tells you when it's done.

Step 6 — Each step reports Success as it goes. When Sync Complete appears (circled above), press Logout in the left sidebar (also circled).

IMPOS

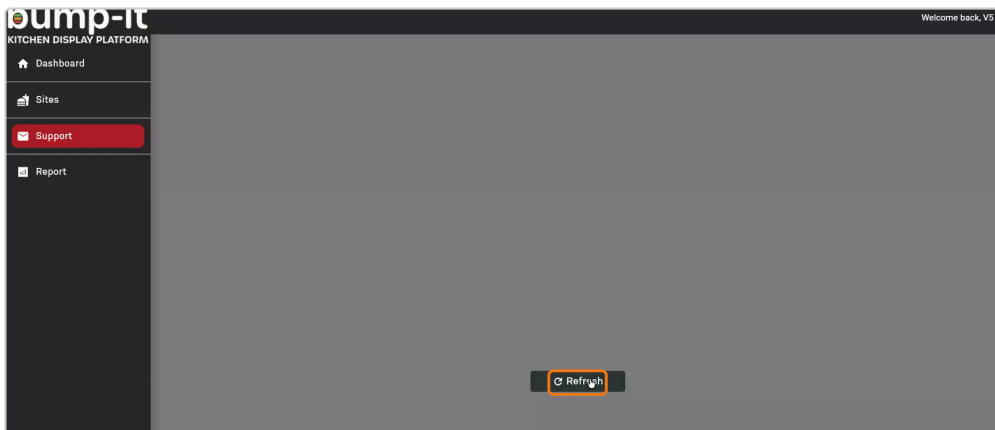

Copy the **Generated API Key** and give it to your IMPOS account manager. They finish the connection at their end, and IMPOS syncs down your Back Office company profile, categories, products, terminals and staff.

Step 6 — The API key is circled above. It's masked here — yours shows in full. Treat it like a password and only ever give it to your IMPOS account manager.

Step 7

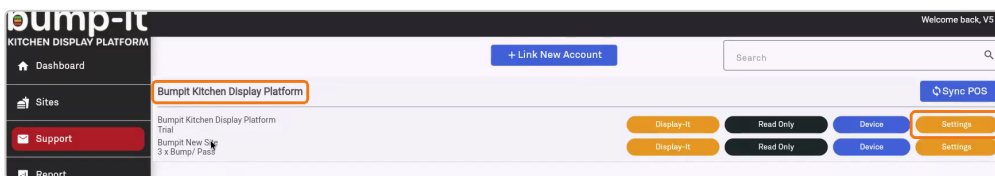

The app is now on a greyed-out screen. Click the  **Refresh** button in the middle.

Step 7 — The screen dims and shows a single  Refresh button. Click it.

Step 8

Your company name appears as the top banner with each venue listed below it.

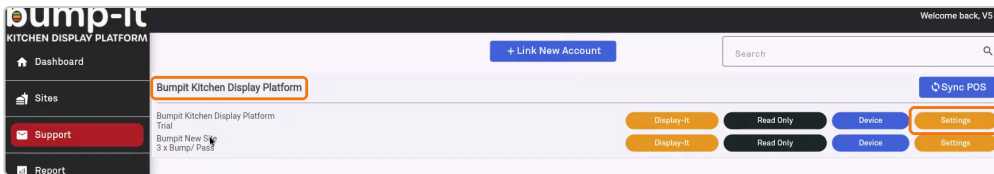

Step 8 — Your company name is circled above. Each venue is listed below it, with its own Display-It · Read Only · Device · Settings buttons.

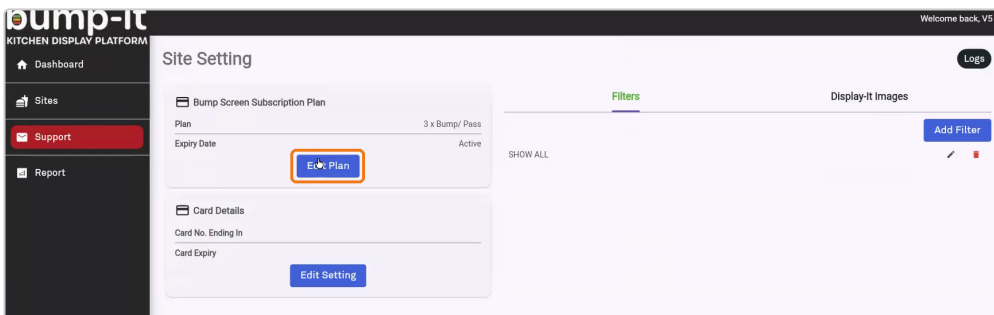

PART C — SET YOUR SUBSCRIPTION

Step 9

On your site row, click **Settings**. Under **Bump Screen Subscription Plan**, click **Edit Plan**.

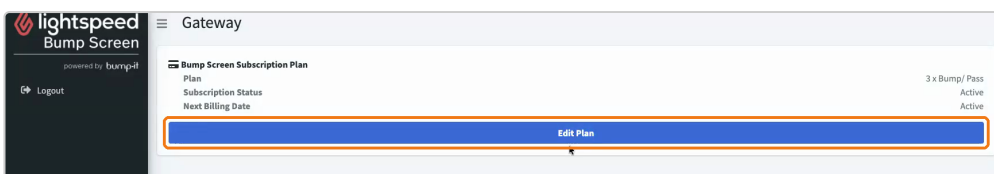

Step 9 — Settings sits at the right-hand end of your site row, circled above.

Step 9 — The Site Setting page then opens. Edit Plan is under Bump Screen Subscription Plan.

Step 10

The Gateway opens. Click **Edit Plan** again, choose **how many subscriptions** you need, then **Save**.

Step 10 — Choose how many subscriptions you need here.

Each subscription includes one bump screen and one pass screen. Your plan shows as "1 x Bump / Pass", "3 x Bump / Pass" and so on.
Set this **before** adding devices.

Step 11

Click **Logout** and return to the app. Guide 1 is complete.

Check before moving on

- ☐ You can log in to Bump-it

- ☐ Your company name and venues appear on the **Sites** page
- ☐ Your subscription shows the correct number of screens

What's next

Guide	Covers
Guide 2 — Adding & Configuring Devices	Add each screen and set its permissions
Guide 3 — Creating & Configuring Filters	Choose what appears on each screen
Guide 4 — Using the Bump Screen	Day-to-day use for your staff
